

Integrations:

JDBC

Bad News

You can't read streams from JDBC

You can't write to JDBC in a streaming fashion

...but you can write batches!

New technique: `foreachBatch`

Takeaways

Some JDBC write support, per batch

```
myStream
  .writeStream
  .foreachBatch { (batch: Dataset[Car], batchId: Long) =>
    batch.write
      .format("jdbc")
      .option("driver", driver)
      .option("url", url)
      .option("user", user)
      .option("password", password)
      .option("dbtable", "public.cars")
      .save()
  }
  .start()
  .awaitTermination()
```
